

Pruden Actuated Ceiling Inlets

PRUDEN Actuated Ceiling Inlets are designed for precise air flow control with your exhaust fans and puts the air where you want it, when you want it.

- Low pivot points direct winter air across the ceiling for better mixing, not down on the animals.
- Heavy-duty solid 3/16" PVC body, one piece welded construction.
- Flexible lip on inlet edge for an airtight seal in cold winter weather.
- Good for minimum to maximum ventilation rates where you need tight control on air exchange.

NEW!

ACI-4000P Actuated Inlet

Aerodynamic design provides

- **Minimum Airflow** - Aerodynamic design provides maximum air speed and distribution
- **Horizontal Airflow** - Prevents drafts on pigs. Horizontal opening 2900 CFM @ 0.10 SP
- **Downward Airflow** - Provides maximum cooling effect. Maximum opening 4300 CFM @ 0.10 SP

A.P. Expert Control VT-100

- Ten relay outputs for fans, heaters, coolers, soakers and time clocks
- Two variable speed fan outputs
- Inlet/Curtain drive output using potentiometer feed back
- Output for tunnel ventilation inlet using timed operation
- Two heat zones

Phason Supra 16 Stage Environmental Controller

Configuration Flexibility

- Up to four zones with four separate temperature probes
- Outdoor ambient temperature probe
- Four variable speed stages, can be configured to heat or cool
- 12 relay stages can be configured for heat/cool, duty cycle or timed event
- A real time clock allows the user to program events for specific times and duration
- One Supra can control a typical finisher barn
- Can be configured for curtain ventilation, tunnel ventilation, or forced air ventilation including inlet actuators

Complete alarm system for monitoring temperature, power failure, feed/water system malfunctions, burglary, bio security, etc. System has all the basic Agri-Alert features plus

- 8 supervised zones that can be activated or bypassed individually or in groupings
- Zones can be configured for dry contact, temperature, pulse count, or burglary
- Outdoor temperature response feature available on the 800t model (uses 1 zone)
- Can call up to 8 different phone numbers
- Built-in microphone for on site listening
- Programmable system ID message

A.P. Curtain Controller

Choose between two models of automated Curtain Controllers to maintain precise control of the environment in naturally ventilated buildings. Available in a variety of curtain travel speeds, both models feature heavy-duty construction with galvanized housings.

- Optional shaft mounted potentiometer provides an accurate and immediate signal to indicate movement and position of the drive.

Pruden Inlet Actuator

PRUDEN Inlet Actuators are designed to work with all PRUDEN Actuated Ceiling Inlets. The Inlet Actuator attaches to the continuous stainless steel rod, the control will precisely position the inlet. Designed for precise air flow balance with your exhaust fans, you can put the air where you want it, when you want it.

FEATURES:

- Total enclosed motor
- Mounts to ceiling or sidewalls

Agri-Alert 800
